- ESENTIAL FEATURES

5. Design and User experience: pg5
6. Technical Requirements: pg5
7. Timelines and Milestones: pg5
8. Budget: pg5
9. References: pg5-6

Project Proposal 1: Letso Luxe

1. Overview of Organisation

History of Organisation

Letso Luxe is a small company dealing in fashion and lifestyle products, which has been in operation since 2026. The concept behind this business is to provide trendy yet affordable fashion to clients. The products include fashion wear, handbags, footwear, jewellery, as well as beauty products. Social media marketing strategies have been used to advertise the products offered by the business, and at present the organisation does not have any website. However, as the business expands, having a website will become necessary.

Mission Statement

Offering quality and affordable products coupled with satisfying customer services and making the experience of online shopping easy and fun.

Vision Statement

To be among the leading online fashion and lifestyle brands in South Africa through provision of stylish products and an easy shopping experience.

Target Market

The target market consists of teenagers and young adults between the ages of 16 and 35 years who like fashion and beauty products and online shopping at a lower pricing range. Specifically known as thrifting.

2. Goals and Objectives of the Website

One of the major goals of the website is to establish a professional online store where the customers can conveniently browse through the products available, purchase them, and learn

about the company. The development of the website is expected to assist Letso Luxe in creating an online presence and getting new clients.

Among the pages that will be used on the website, there will be Home, Shop, About Us, Contact Us, and Special Offers. Customers will have access to the features that allow searching for products, viewing product descriptions, adding products to the cart and ordering them.

The success of the website will be evaluated based on the following KPIs:

- Increase the number of website visitors every month.
- Increase online product sales.
- Get more client inquiries via the contact page.
- Decrease the number of abandoned shopping carts.
- Attracting return customers via promotions and special offers.

3. Current Website Status

At present, there is no website for Letso Luxe. Social media platforms serve as primary means to promote the products and connect with the clients. Though social media can be helpful for marketing, it suffers from a number of drawbacks. Clients do not get an opportunity to see the full range of products available, compare prices and purchase their products through one place. In addition, information may become hard to trace because of numerous posts being added.

Creation of a website will eliminate the problems and will allow Letso Luxe to have one common platform where its customers can shop and connect with the company, as well as stay up to date with new products.

4. Suggested Website Features and Functions

The proposed features of the Letso Luxe website will be made for making shopping convenient and pleasant for clients. The website will include the following pages and functions:

- Homepage – An introduction to the business, showcasing featured items, new arrivals, and current promotions.
- Shop page – Where customers can shop for products according to categories, for example clothing, accessories, shoes, and beauty products..
- Shopping Cart and Checkout – Customers will be able to add products to the cart and place orders.
- About Us Page – Information about the business, its mission and uniqueness of Letso Luxe.

- Contact Us Page – Contact form, email address, phone number, and social media profiles.

5. Website Design and User Experience

Letso Luxe website will have trendy, yet stylist designs corresponding to the image of the brand.

- Colours: Yellow and white
- Font: Arial
- Layout: Simple navigation with clear product images and categories.

Layout and Design

The home page will have a larger banner which highlights new arrivals or promos. The products will be shown in neat rows with visible images and prices. A navigation menu will be placed at the top of every page so that customer can quickly move between categories (e.g. Shein).

6. Technical Requirements

The website will be created using:

- HTML: to create the structure of web pages.
- CSS: to style the website and to make it aesthetically pleasing.
- JavaScript
- Web hosting
- Domain name e.g., www.letsoluxe.co.za

7. Timelines and Milestones

DAYS (PER 3 DAYS)	TASK
1-3	Plan the website.
4-6	Structure the website's layout.
7-9	Build the website.
10-12	Test and make changes where needed.

8. Budget

Item	Cost
Domain Name	R200
Web hosting	R950
Web design and development	R4500
Maintenance (per month)	R700
Total	R6350
